CONTACT US

POWERSTAR

Powerstar Service Centre can assist with specialised units which is tailor-made and built to clients specifications and requirements.

Powerstar Empangeni recently delivered a fire-and-rescue unit to a mine in Limpopo province. Read why a Powerstar was chosen to fill this very important need

Powerstar offers affordable solutions

Powerstar, SA's up-and-coming truck brand, recently showed just how versatile it is. The local branch, Powerstar Empangeni, delivered a complete firefighting and rescue unit to Foskor's phosphate mine in Phalaborwa.

This fire and rescue truck was imported directly from China, fully equipped, and boasts all the necessary features and equipment to deal with most mine-related emergencies.

Powerstar Empangeni was able to supply the Foskor group with this vehicle at half the price than what it would have cost to have a similar vehicle put together in SA, thus making for a huge cost saving for the client.

As with all Powerstar's trucks, the focus is not just on affordability, but also on

reliability and easy of operation - without compromising on quality.

The fire-and-rescue unit is built on a Powerstar 3353 VX 6x4 long-wheel base chassis-cab with the following specifications:

Truck base

Powerstar the 3335 is a 9.7-litre Weichai Euro 2 six-in-line engine, which puts out 250kW of power at 2 200rpm and delivers 1 350Nm of torque from 1 600rpm upwards.

Shifting happens through a 12-speed synchromesh transmission.

The Powerstar 3353 VX 6x4 long-wheel chassis-cab unit has a wheel base of 4 800mm and a GVM of 33 000kg with a permissible axle masses of 7 800kg on the front and 18 000kg on the rear.

The truck has a Grade Ability at GVM of 30% which exceeded the mine's requirement of 18%.

Destined to work in a mining environment, the client requested the truck to meet numerous smaller requirements such as rough terrain tyres and heavy duty vinyl surfaces throughout the cabin, all which the big yellow Powerstar met.

Fire/rescue unit

The client was very specific about the requirements of the actual fire-and-rescue unit, fitted onto the chassis, had to meet.

These are just some of the points on a very long list:

- Fire tender to be fitted with maintenance free deep cycle batteries
- Failsafe engine protection system
- A two-way radio system

- Four H-type hydraulic outriggers for stability
- A mid-ship mounted Hale RSD100 centrifugal water pump with a flow rate of 6 000-litres per minute
- Various pump plumbing controls, gauges and discharge points
- A main water tank capacity of 2 500 litres.

Dealer Principal of Powerstar Empangeni, Jay Reddy, says they complied with all the requirements and although they were up against established truck brands, Powerstar was awarded the tender, proving that SA's youngest truck brand can compete on equal terms in Africa because 'these trucks are built for Africa'.

Jay invites all fleet owners to visit Powerstar Empangeni to find out what this brand can do for their businesses.

Powerstar is perfect for construction

Nothing tests a truck's durability as much as the construction business and for Allison's Plant Hire there's only one brand which they count on; Powerstar.

Based in Verulam, Allison's Plant Hire first bought two Powerstar trucks for their extensive fleet and noted that these vehicles are well suited for their business needs. The trucks operated well under the tough and rigorous terrains, and not only did they prove to be reliable and easy to service, but also very fuel efficient.

Owner of Allison's Plant Hire, Hoosen Alli, says that his first two Powerstars got the job done without fuss and that's why he decided to invest in four more. 'These trucks are specifically designed to work hard under arduous conditions and that's exactly what my business needs', says Alli.

'Also, as a fleet owner, my demand is to receive great aftersales service and backup from the brand, and that's exactly what I get from Powerstar Empangeni'.

Owner of Powerstar in Empangeni, Jay Reddy, says he's elated with the brand's performance in the field as well as dealership's growth since it opened its doors two years ago.

'Just look around... you will find Powerstar's everywhere and they are working hard', says Jay, 'this prove the Powerstar's credence, that these trucks are certainly built to last!'

Tanking delivery of four more tippers from Empangeni are Hoosen Alli (left) and Redhwaan Allie (right). In the centre is Jay Reddy, proud owner of Powerstar Empangeni.

POWERSTAR powers forward in Zululand

Just over a year ago Powerstar trucks opened a branch in Zululand and in this short space of time the company has indelibly stamped its mark on the local and national trucking market, having already received the accolades 'Dealer of the Year' and 'Best Parts Distributor'.

Situated at Maguzulu Business Park in Empangeni, this dynamic up-and-coming dealership has also received a certificate for its excellent sales.

Jay Reddy, owner of Powerstar Empangeni, is elated with the progress this young dealership has made over such a short period.

'The brand is very strong in Zululand and many Powerstar trucks can already be seen on local roads,' he says proudly.

'Since we opened our doors a little over a year ago, we have been building and establishing good relationships with all the businesses with Powerstar trucks in their fleets. We offer them an A-Z service from our well-equipped dealership and proficient team.

'I would like to thank all our customers for their support and also my dedicated team at Powerstar Empangeni. Without you, we could not have done it,' concluded Jay.

Services we offer:

New truck sales | Aftermarket service
| Parts availability

24/7 PARTS & BREAKDOWN SERVICE

TOUGH AND RELIABLE

Powerstar trucks, which have been in South Africa for 10 years, provide affordable and reliable vehicles to fleet owners who make use of large trucks.

Plenty of thought has been poured into making these trucks as simple and basic as possible, using sound no-nonsense performance principles and avoiding overcomplicated gizmos. The result is a vehicle which is durable, dependable and simple to maintain.

Factor in the attractive pricing, excellent economy and low cost per kilometre, and it becomes clear why Powerstar is so popular with construction companies, in particular. Industries such as mining and quarries, transportation of liquids and general freight among others, would also benefit immensely from the Powerstar range of trucks.

Assuring peace of mind, there is a comprehensive Powerstar dealer network across Southern Africa which sells, services and maintains its truck range (short and long wheelbase) comprising: 4x2, 4x4, 6x4, and 8x4 chassis cabs, with truck tractors offering a power range of 270 - 460 HP.

POWERSTAR

SERVICE CENTRE

CORPORATE SOCIAL INVESTMENT

Powerstar Service Centre believes in investing in the community and giving back, which is why the company is involved in various social investments. Thutukani Special School is one of the beneficiaries. The company has been a sponsor for several years and its currently heading up their pool refurbishment project.

TESTIMONIALS

Hans Meyer – Workshop Manager, Induna Logistics

‘We have 20 Powerstar trucks in our fleet. As with all the other brands, put a good driver behind the wheel and it will serve you well. I predict that Powerstar is going to grow in SA in the next five years because they provide an affordable solution to Fleet owner’s transport needs.’

Raymond Naidoo – Devray Plant Hire, Alton

‘Powerstar represents good value for money and is a competitive truck brand. I have eight in my fleet and am happy with my investment. Service and parts are affordable, which makes for lower running costs.’

Radds – Suren Radhalal – RADDs

‘RADDs have about 400 Powerstar trucks doing duty across the country. They are hardworking machines which are suitable for Africa’s harsh conditions. Pricing is good and the parts are affordable and we are also pleased with the after-sales service.’
